Fund Manager Comment																																												
<p>Month of May didn't look favorable compared to the preceding months of the year with inflation emerging strong globally along with labor market tightness. The current level of inflation is fueling aggressive stance of the Fed/other central banks while investors remain cautious over growth outlook going forward. Russia-Ukraine war continued during the month without much resolution and China continues to grapple with Covid inducing much of the supply side inflation.</p> <p>US 10-year treasury rate ended lower at 2.84% from the 2.93 % of previous month consequent to safe haven flows much to do with global market volatility. Fed also hiked rates by 50 bps during the month as expected and is expected to hike several times during the year with terminal rate being expected to be close to 3%. We continue to maintain lower duration as the impact of rate elevation is higher compared to the shorter end elevation.</p> <p>Brent ended marginally higher at c.USD 122 from USD 109 as of previous month. The elevated price levels have impacted GCC Sovereign financial strength materially with improved outlook and increased reserve levels. Regional IG and HY space still appear favorable compared to the global counterparts and will continue to attract flows from yield seeking investors.</p> <p>QNB Global Sukuk Fund was launched in October 2018 and has distributed seven coupons so far. Fund manager continues to seek for Sukuk Investments that would add value to the fund in the longer term. The Fund manager maintains a lower duration of c. 3.50 years until there is adequate normalization of rates.</p>
